

The Microdispensing Technology Leader now at ARCOZ AG

VERMES Microdispensing, one of the most renowned suppliers of microdispensing systems in the world, has chosen ARCOZ AG as its exclusive and official representative in Switzerland.

About a year ago, we announced to you: “In the future you can expect even more from us”.

This promise has been kept. Not only have we successfully changed our corporate name, but we have also redefined and optimized our product portfolio.

We are particularly proud to have been chosen as the exclusive representative of VERMES for Switzerland and its neighboring regions.

Team ARCOZ AG

Revolutionized microdosing technology from VERMES

Since the end of the 80's, VERMES has been mainly dedicated to the production of piezoelectric systems for needle printers and seismographic printing systems.

With this experience in the field of piezoelectrics, VERMES revolutionized microdispensing technology in 2001 with the introduction of the **MDV Series 3000** valves. Since then, the world leader has continued to develop new concepts and systems. Each more innovative than the last. Suitable for all types of fluids, including adhesives, silicones, greases, solvents and a wide range of welding pastes.

We offer the full range of VERMES microdispensing products

The **MDS 15XX** and **3XXX** series have been proven in thousands of applications. They're now also presented in our ARCOZ AG showroom.

Contact us and let us convince you of the precision and performance of this technology with a free demonstration at ARCOZ AG.

Maybe with your own product?

ARCOZ AG is the exclusive VERMES distributor in Switzerland

ARCOZ AG now has the exclusive distribution rights for all microdispensing products in Switzerland and the neighboring regions. This allows us to offer you all related products and services, such as consulting, feasibility tests and studies, a spare parts department and a complete after-sales service.

Important information

In addition to microdispensing technology, we are pleased to announce that we will soon be launching a whole new range of “Swiss made” volumetric and pressure/time dispensing valves for small, medium and large volumes. For both standard and custom applications.

This will enable us to offer you an even wider range of efficient and highly reliable dosing solutions in the future.

Thank you for your confidence in ARCOZ AG.
We take great pride in continuing the path of innovation and excellence with you.
